### SKILLS

Problem Solving

Database Design

Version Control

Adaptability

Responsive Design

Teamwork

### TECHNOLOGIES

{.js}

JavaScript

Docker

Industrial Engineer with experience in Full-Stack development working with technologies such as JavaScript, React, Node.js, and MongoDB, along with version control, cloud deployment tools and solid knowledge of process engineering. Passionate about optimization and continuous improvement, with strong skills in identifying opportunities for enhancement. I am a team-oriented professional, proactive, solution-driven, and passionate about new challenges.

### EDUCATION

#### Industrial Engineering

Graduate - Universidad Militar Nueva Granada (2017 - 2022)

#### FullStack Developer

Self-taught - 2020 - Present

### EXPERIENCE

#### Frontend Developer

[www.golky.co](http://www.golky.co) - 2022 - 2023

- I was responsible for creating the required interfaces based on the provided design specifications, ensuring they were fully functional and visually aligned with the project's objectives. Additionally, I guaranteed the seamless execution of various interactions across the different views, focusing on delivering a smooth and intuitive user experience.

#### FullStack Developer

FreeLance - 2024

- I developed a CRM for a U.S.-based company, transforming a manual process into a software solution to ensure proper information flow and management, using AWS, MongoDB, NestJS, and React.

## TECHNOLOGIES

*equipmentsshoparound.com 2024 - 2025*

- I developed the Equipment Shop Around website from scratch as a Full-Stack developer, using technologies such as AWS, Node.js, and TypeScript. I was responsible for designing and implementing the frontend, creating APIs on the backend, and configuring cloud infrastructure to ensure scalability and performance.

*Ikualo may 2025- present*

- I work as a Full-Stack Developer, contributing to the backend with technologies such as NestJS, microservices architecture, and MongoDB. On the frontend, I collaborate on the maintenance and development of new interfaces for the website using React and Vue. Additionally, I contribute to the mobile app IKUALO development using React Native.
