React · git · aws · mongoDB

EDUCATION

Industrial Engineering
Graduate - Universidad Militar Nueva Granada (2017 - 2022)

FullStack Developer
Self-taught - 2021 - Present

EXPERIENCE

FullStack Developer

equipmentshoparound.com 2024 - present

- I developed the Equipment Shop Around website from scratch as a Full-Stack developer, using technologies such as AWS, Node.js, and TypeScript. I was responsible for designing and implementing the frontend, creating APIs on the backend, and configuring cloud infrastructure to ensure scalability and performance.

FreeLance - 2024

- Developed a CRM for a U.S.-based company, transforming a manual process into a software solution to ensure the proper flow and management of information.

Frontend Developer

www.golky.co - 2022 - 2023

- I was responsible for creating the required interfaces based on the provided design specifications, ensuring they were fully functional and visually aligned with the project's objectives. Additionally, I guaranteed the seamless execution of various interactions across the different views, focusing on delivering a smooth and intuitive user experience.
