Industrial Engineer with extensive experience in Full-Stack development, specializing in JavaScript, React, Node.js, and MongoDB. Proficient in version control, cloud deployment, and the application of process engineering principles to software development. I am deeply passionate about optimization and continuous improvement, with a proven ability to identify and implement impactful technical enhancements.

I am committed to constant professional evolution, actively exploring Artificial Intelligence and cutting-edge technological advancements to drive efficiency and innovation. A proactive, solution-driven, and team-oriented professional, I am always seeking new challenges that push the boundaries of what is possible.

EDUCATION

Industrial Engineering

Graduate - Universidad Militar Nueva Granada (2017 - 2022)

FullStack Developer

Self-taught - 2020 - Present

EXPERIENCE

Frontend Developer

www.golky.co - 2022 - 2023

- I was responsible for creating the required interfaces based on the provided design specifications, ensuring they were fully functional and visually aligned with the project's objectives. Additionally, I guaranteed the seamless execution of various interactions across the different views, focusing on delivering a smooth and intuitive user experience.

TECHNOLOGIES

FullStack Developer

FreeLance - 2024

- I developed a CRM for a U.S.-based company, transforming a manual process into a software solution to ensure proper information flow and management, using AWS, MongoDB, NestJS, and React.

equipmentsshoparound.com 2024 - 2025

- I developed the Equipment Shop Around website from scratch as a Full-Stack developer, using technologies such as AWS, Node.js, and TypeScript. I was responsible for designing and implementing the frontend, creating APIs on the backend, and configuring cloud infrastructure to ensure scalability and performance.

Ikualo may 2025- feb 2026

- I work as a Full-Stack Developer, contributing to the backend with technologies such as NestJS, microservices architecture, and MongoDB. On the frontend, I collaborate on the maintenance and development of new interfaces for the website using React and Vue. Additionally, I contribute to the mobile app IKUALO development using React Native.

ImageMarker (Consultancy for EstablishmentLab) feb 2026 – Present

- I serve as a Senior Frontend Developer, leading the development and maintenance of web applications using React and Vue. My role focuses on ensuring scalability, optimizing performance, and implementing new features within the EstablishmentLab digital ecosystem, maintaining high standards of code quality and architecture.
